

EXCEL SALES ANALYSIS AND DASHBOARD PROJECT

Project Overview:

This project contains a professional-grade sales analysis tool developed within excel sales analysis & dashboard project.xlsx. The project focuses on converting transactional sales data into actionable business insights through interactive visualization.

Key Features

- **Dynamic Dashboard:** Built an interactive UI with slicers and timelines for real-time data filtering.
- **Sales Trend Analysis:** Visualized Year-over-Year (YoY) growth and monthly revenue fluctuations.
- **Regional & Product Performance:** Identified high-performing territories and key product drivers using Pivot Charts.
- **Automated Reporting:** Streamlined the data update process, allowing for one-click report refreshes.

Tech Stack

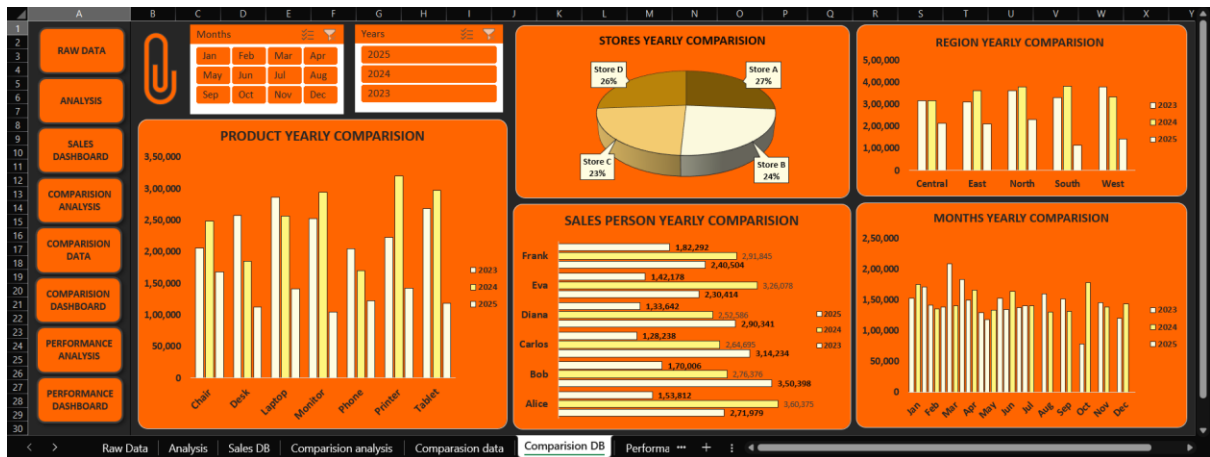

- Microsoft Excel (Pivot Tables, Advanced Charting)
- Conditional Formatting & Data Validation
- Dashboard Design Principles

The screenshot shows a comprehensive dashboard layout. The sidebar on the left contains eight navigation items. The main area is divided into a header with five KPI cards and a body with six charts. The charts include a pie chart for payment methods, a bar chart for sales by person, a bar chart for sales by store, a horizontal bar chart for sales by month, a pie chart for customer types, and a line chart for sales by region. A right sidebar provides a month selection interface.
